

"So, what's the problem, sir?"

# Sometimes... it's about your EYES.

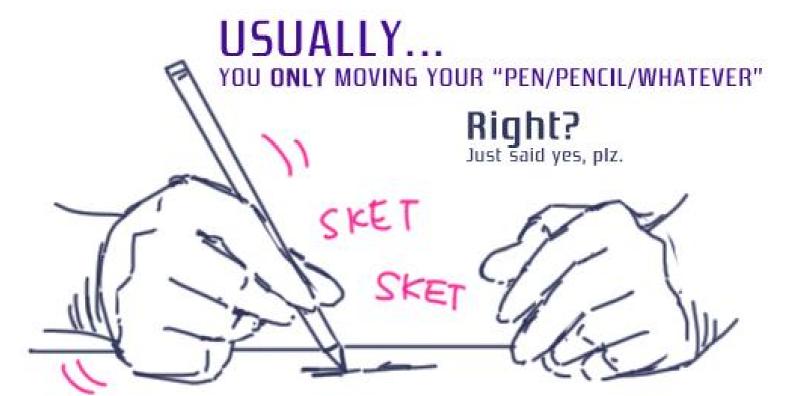

Focus on where your line should be ended!

# In another cases... it's about your HAND.

# then... HOW ABOUT YOUR "ARM"?

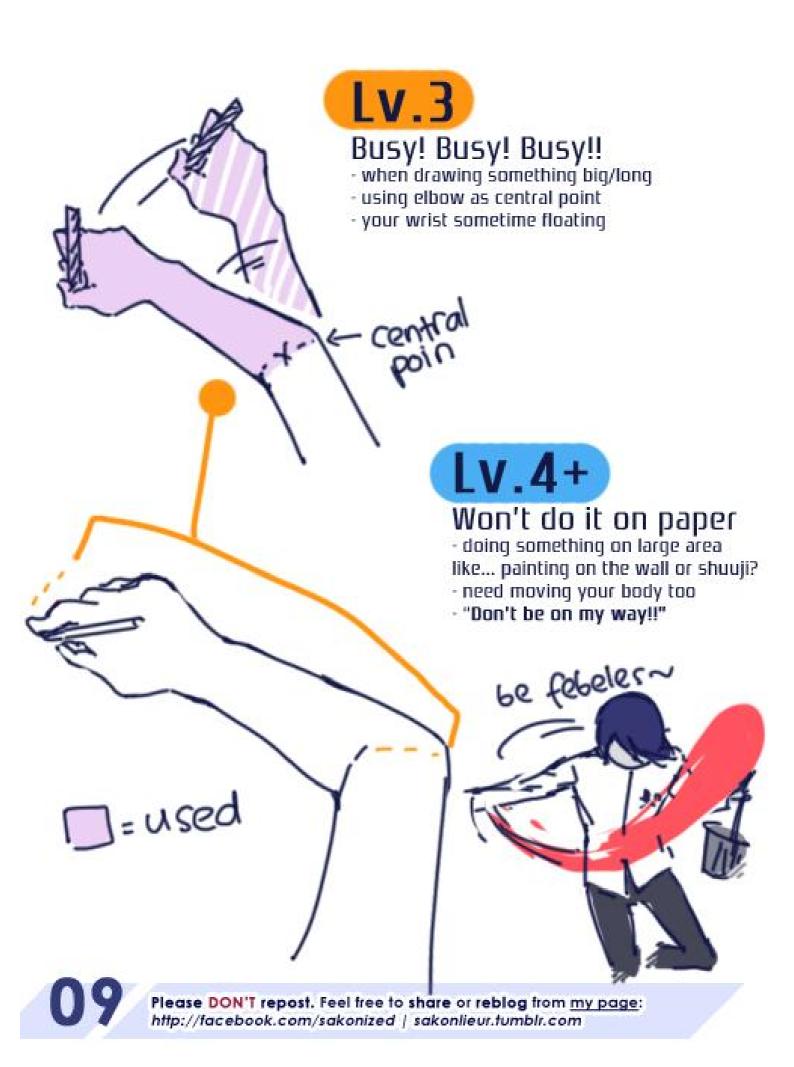

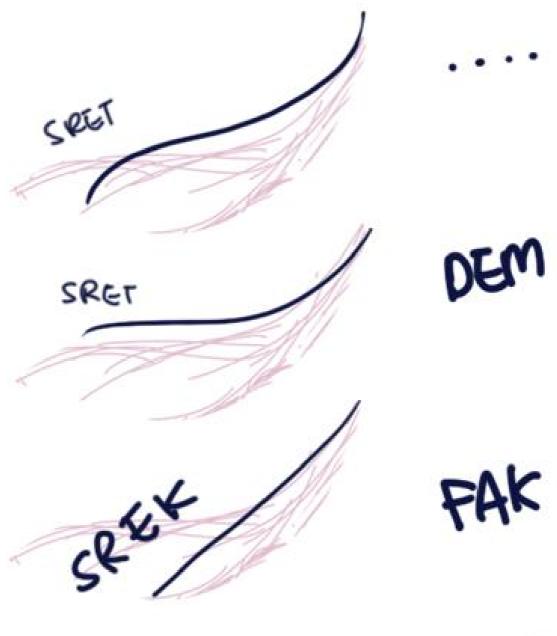

#### Just remember this GUY.

Such Move, Much Febeles

### Lv.0 A little 'shaking' for (freaking) small detail V. Normal line - only using a little part of fingers - more than 1000 dots and you got numb - .....feels like writing? MONING feels like doing nothing but tired main detail. using all your fingers - palm & wrist still unmoving =used Lv.2 Yeah!! I'm working!! you can see your hand moving - feels like drawing... TTvTT did it for the main line Please DON'T repost. Feel free to share or reblog from my page: http://facebook.com/sakonized | sakonlieur.tumblr.com

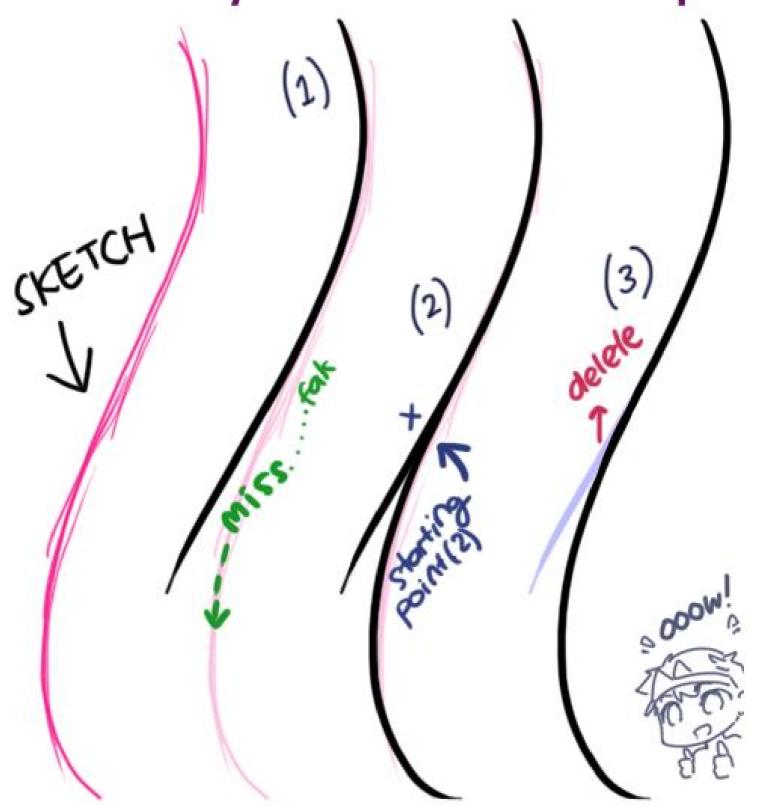

### Rather than doing it by ONE STRIKE, try it with some steps

It could be 3-4 or more depending the length

# Don't forget (I truly recommended)

## to play with ZOOM IN/OUT!

Why? Coz you can control your hand moving.

Zoom in for doing detail,

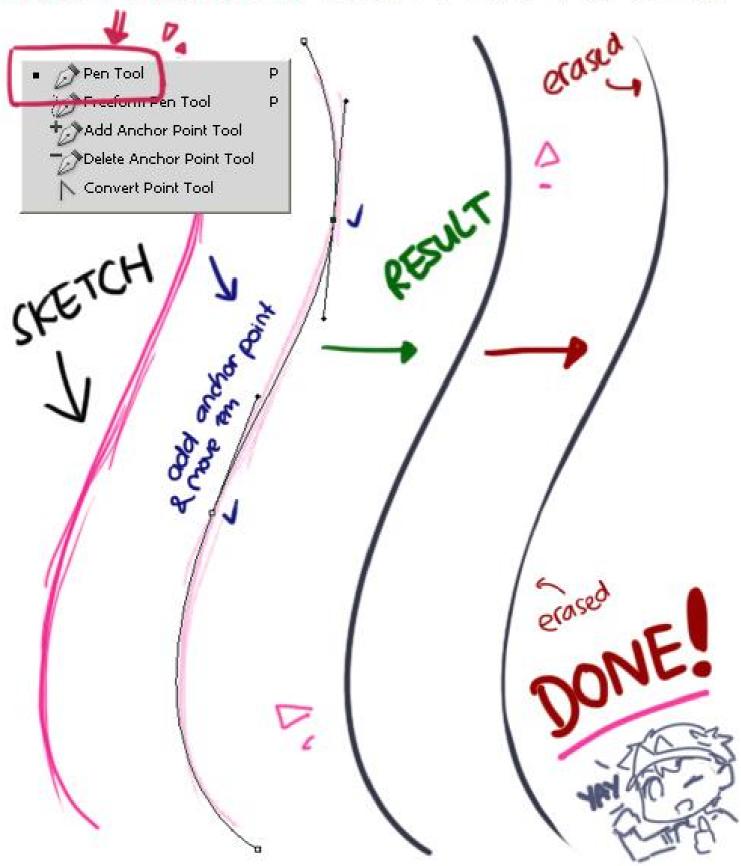

zoom out for doing large part.

# Zooming in tradi works

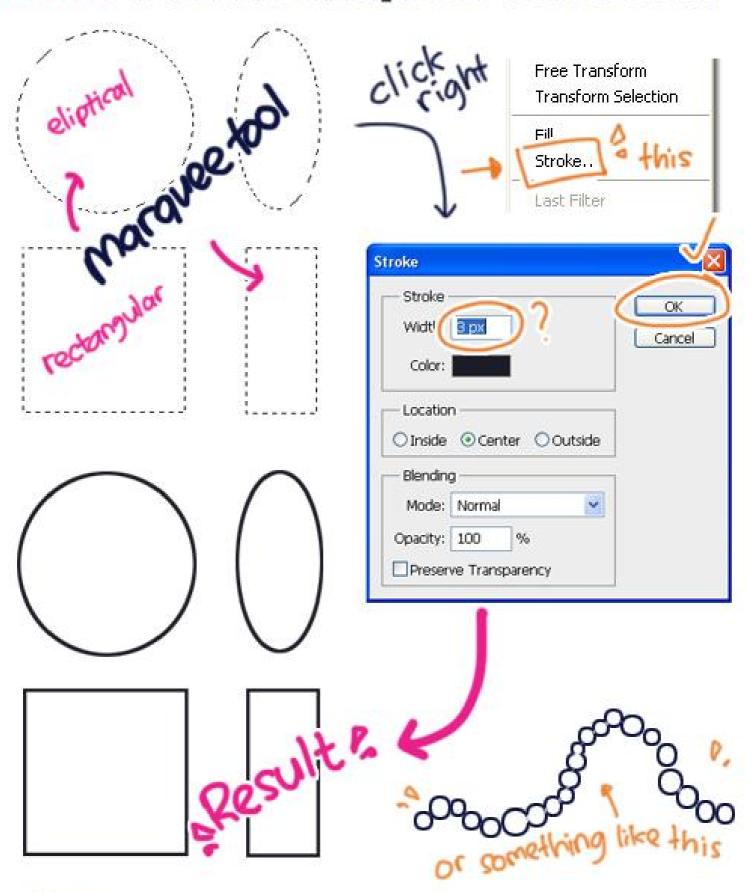

# Zooming in digi works

#### LOST PATIENCE? USE PEN TOOL!!

#### LAZY? USE MARQUEE STROKE!!

#### Shortcut for.... straight line?

Make a dot (as start point)

2. Click and hold "SHIFT"

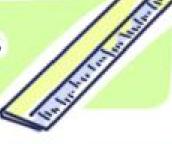

Click somewhere...

excuse me., and this is a ruler, for you all tradi artist.

#### I added more item...

#### above my precious lineart that I did for xxx hours!!

but it's breaking my heart if I erased them.. I don't wanna!! TIAIT

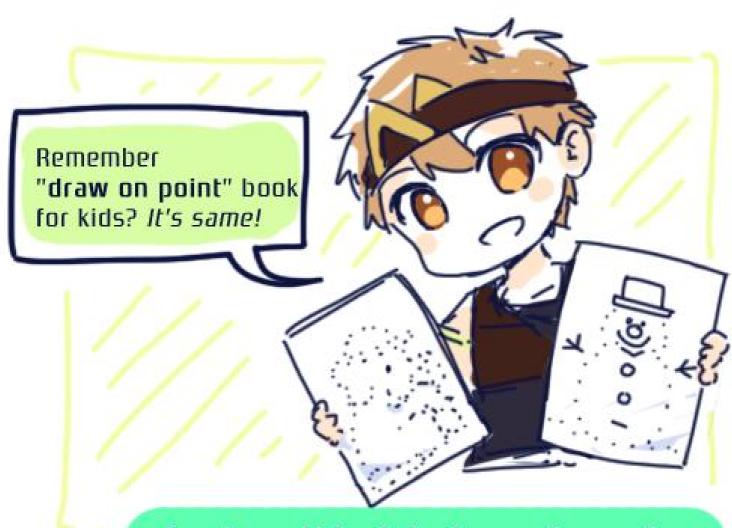

Note: "Disable Layer Mask" to unactivated the function.

By reading this TIPS won't make your work more easier. [LOL] Yes, I mean it.

Working on lineart still take a LOT of time, so you should find some 'happiness' to KEEP GOING ON.

## but with higher level...

for adult of course

Gezzz... why my sketch this troublesome...

#### Find out your what kind lineart you desire!!

# Wathing streaming! can motivate you too:D

\*Mental stability is required too
